DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 10-11, and 14-18 are drawn to a exercise garment having an adjustable tension control element about the torso portion, classified in class 2, subclass 69.
 - II. Claims 20-28 are drawn to a exercise garment having a leg portion with pockets having weights therein, classified in class 482, subclass 105.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are structurally unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case invention I pertains to a exercise garment having an adjustable tension control element about the torso portion that is classified in 2/69, while invention II pertains to a exercise garment having a leg portion with pockets having weights therein that is classified in 482/105.
